

The name of our school is Albert Einstein and it's a scientific High School. Our school is located in Palermo, Italy. The Scientific High School "Albert Einstein" was founded in 1969 with the name of "Third Scientific High School" following the split from the "S. Cannizzaro" high school. In 1982 the Institute acquired its current name. In our school we study mainly scientific subjects like Science and Chemistry. The most important subjects are Maths and Physics. Then, there are the traditional subjects like Italian, English, History and Geography, P.E. and Art history. There are also two sections which you can choose from, where we also study special subjects. In the traditional section we study Latin but for Applied Sciences we study Computer Technology. Our school has many laboratories, for example: a chemistry laboratory, a drawing laboratory, a language laboratory, a computer laboratory, a Physics laboratory and a library (that, since 2004, has over 4000 volumes). Liceo Einstein offers extra-curricular activities, for example: Dante's studies, Test center Eipass, and Cambridge English exams preparation, "Palermo Science-Experience teaches", Erasmus+, E- twinnings and "Care or Scare".
